Synchronization Maitre'D / Acomba

Chro is a software intended for owners of Maitre'D software. This tool exchanges information between your catering and accounting systems to ensure that your data is consistent. No more double entries of information that is subject to error!

It will synchronize information between Acoma and Maitre'D for accounts receivable, accounts payable and general ledger data.

It will make sure that each client in your accounting system will be synchronized with your Maitre'D, client number, client name and credit line and your general ledger chart of accounts will be retrieved from Acoma and sent to Maitre'D.

Following the daily deposit operation in Maitre'D, we will send in your accounting system all the customer invoices that have been posted to the accounts, "so that you can do an administrative follow-up in your accounting software.

The invoices to be paid to your suppliers are also part of our exchanges. Ideal for those managing the inventory from Maitre'D, we send all your inventory entries to your accounts payable interface.
