PICO

OSPERIA.COM

Simplify your life

Solution for managing your restaurant payroll.

Pico is a software intended for owners of the Maitre'D software. This tool will allow you to send a computer file to your banking institution, payroll service or your accounting software.

It recovers all the relevant information directly in Maitre'D and makes the appropriate conversions.

The software can improve your management of tips, timecards and avoid data entry that often generates multiple errors.

Our software verifies the % declared, and in case of insufficiency, it will attribute the difference before transmitting the data to your payroll department.

In addition, it will transmit the hours worked, hourly rates, earnings codes and much more! In this way, your payroll service will increase in speed and your business in efficiency.
