

OSPERIA

BUILT & SUPPORTED IN QUEBEC

VIGIL — REAL-TIME PROGRAM MONITORING

Your critical software. Monitored 24/7. Without interruption.

VIGIL continuously monitors your software and **automatically restarts** it when it fails — with no human intervention required.

REAL-TIME MONITORING

Your software status is checked continuously — any anomaly is detected instantly.

AUTOMATIC RESTART

VIGIL relaunches the failed program before you even notice the issue.

ALERTS & NOTIFICATIONS

Get notified by email for every incident or automatic restart on your systems.

Developed by Osperia in Quebec — Compatible with Maitre'D and all Windows software.

Local human support · No AI for customer service · 100% Quebec-based
